Dear Ms. Fript:

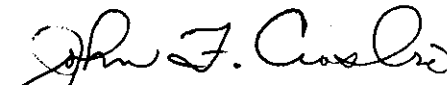

Re: HIMCO Landfill
Elkhart, Indiana

Crosbie Foundry has never generated any waste material containing sodium. Since its inception in 1956, Crosbie Foundry has always been a very small company (currently 25 employees). The very small amount of waste this company generated during the time the HIMCO County Road 10 landfill was open most certainly did not contribute to any ground water problem involving sodium.

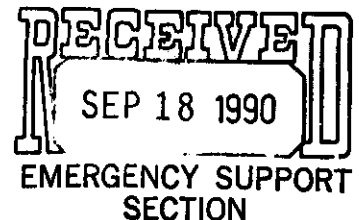

We, therefore, decline to participate in sharing any costs for clean-up or related remedial actions pertaining to sodium contaminated ground water at the HIMCO County Road 10 landfill.

Sincerely,

CROSBIE FOUNDRY CO., INC.

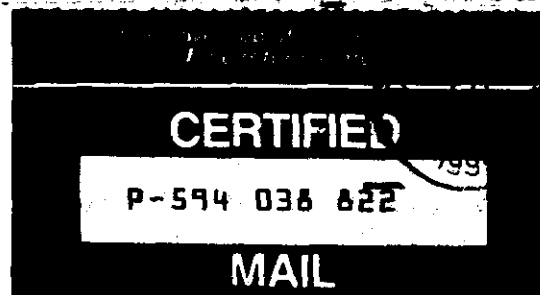

John F. Crosbie
Secretary/Treasurer
